SOURCE FBIB

Since 9 October 1948 deliberate jamming has been evident during the entire broadcast at 06:00 - 09:00 EST daily from the Chinese Communist Radio known as the North Shensi Broadcasting Station. This station transmits on the measured frequency 7495 kilocycles, and the frequency of the jamming transmitter is observed to drift slowly between 7490 and 7510 kilocycles. The jammer has a band width of fifteen kilocycles and is modulated with a rough note of approximately one hundred cycles. It appears on the air a few minutes before the North Shensi broadcast opens, and it leaves the air almost immediately after the termination of the North Shensi broadcast.
